

## Change the Month on a Calendar

It's easy to change the month on a calendar in myStory Designer. Here's how!

Create or open your calendar project.

Right-click on the calendar grid and select **Format calendar**.

In the **Element properties** box, with **Calendar** selected, click the arrows beside the month until it displays the month and year that you want. Then click **Apply**. Click OK to close the box. Repeat this process on every page of your calendar that requires changing.
